

CTS DAY-1 TASK

Started cts training in try hack me

First selected the room as default

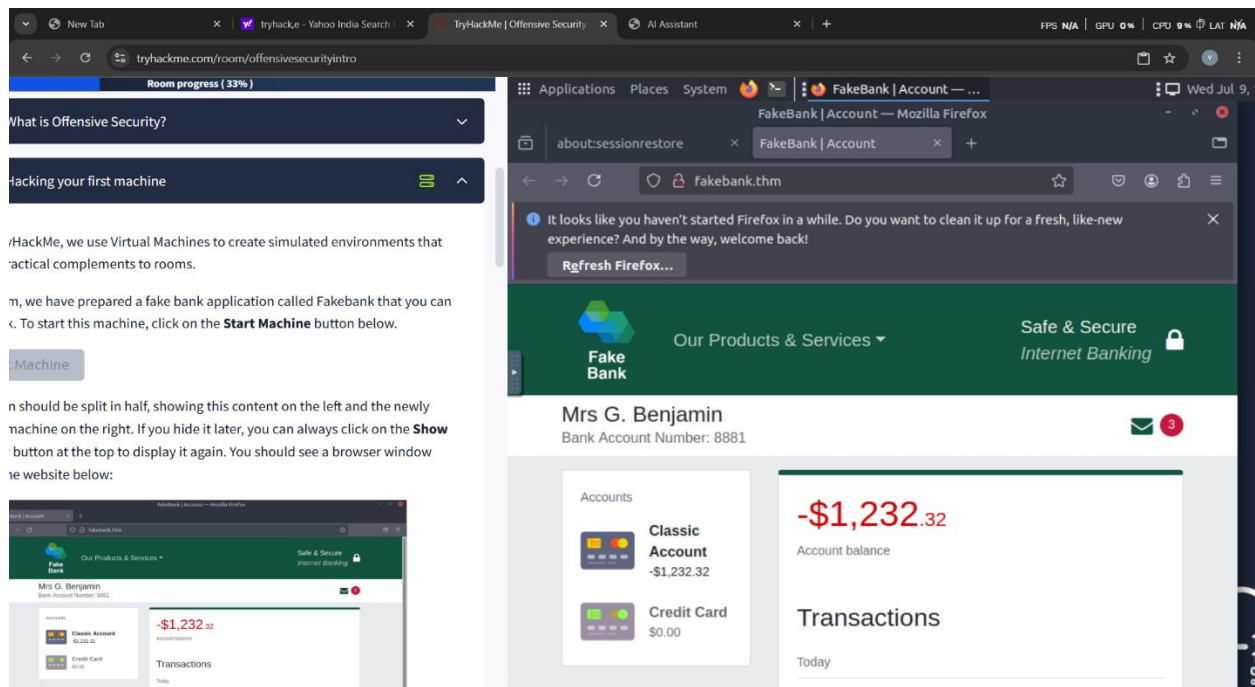

The selected room was offensive Security

In that I had read the details about the offensive security

Answered a question as offensive security.

Then I started a virtual machine to hack the bank

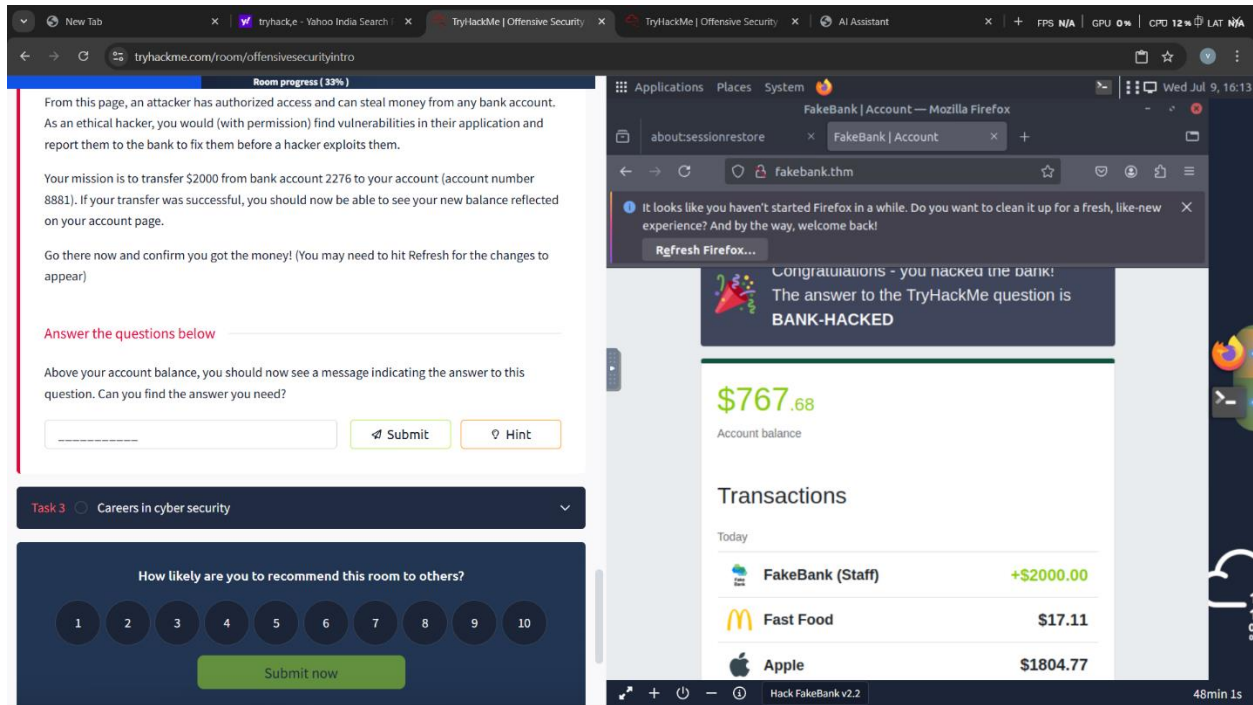

It was with a bank server

Then opened the terminal and typed gobuster command and run

Then found the new url and paste

Open a new page for transaction and transferred \$2000 from one account to another

There I got the flag

BANK-HACKED

Thus after completing the certain questions I submitted the room .

Thus I completed the room.
